2nd person on stage
17

ROM + Strain

Some event timestamps hit buffer limits (counts were still recorded).

● R arm (left axis °) ● L arm ● Assisted interval ● Target ● Compensation ● Strain (right axis %)

Peak strain %41 · Avg %33 · Peak angle R 6° / L 14°

Clinical Notes

- 1 reps were marked **invalid** due to trunk compensation.
- Target angle was reached or exceeded.
- 21 trunk compensation event(s) detected.
- 128 tracking/frame jump event(s) recorded — ROM reliability may be reduced.
- 17 time(s) a **2nd person** was detected on stage (logged even if help toggle was off).
- Peak face strain %41 (mean %33).
- Session quality score (QualityScore QS-1.0): mean %89, min %49 — Reliable. Peak ROM was not updated on low-quality frames.
- Event timestamp overflow: 28 (counts kept; chart markers may be capped).
